Web Design and Development

Reduce Overhead

Please ask how I am prepared to assist in reducing the overall price of my services and deliver top-quality.

Cost-Effective

The creation of media that can be used for any purpose, such as designs that are flexible and therefore easily used for both digital web media and print work is very important. Of course, each project has limitations. I can defiantly think outside the box, and pride myself on the ability to merge the two when necessary. The end result is cheaper more cost-effective resilient advertising.

Thank You

Please feel free to contact me regarding any topic. I will be happy to help you create lucrative, effective advertising.

- Eager to assist you reach more customers
- Persistent Agile Advertising Helps You Rise Above the Rest
- Cost-effective Resilient Advertising
- Web design, development and deployment
- PHP, MySQL, XHTML, CSS, JavaScript
- Web standards and accessibility
- Search engine optimization

If there is anything I can assist you with, please feel free to send correspondence via the [contact](#) link. I will be happy to work with you to provide a solution for your projects and give them as much attention to detail as I would my own. I understand that the state of our economy is bleak, and we all need a helping hand to reduce our overall cost.

It is a proven fact that companies and individuals that continue to advertise during a recession maintain higher levels of revenue substantial enough to overcome. As we all strive to reduce overhead cost, what better way than by producing your own web site or digital advertisement to augment revenue. In the long run, advertising on a regular basis can be cheaper, faster and more impacting. Are you advertising?

Your current advertising venture, like any other, has three to five seconds to capture the attention of your audience. Do your current advertisements give your audience reason to want to view your ad and then choose you?

Internet advertisements and digital web media tend to be less expensive than commercials or air time on the television or radio. Printed advertisements do not stand the test of time, and are impossible to update after printing. When re-printing is necessary due changes in your business strategy, printing cost only adds to your overhead.

Further, custom-fit web sites and digital web media can be altered and displayed immediately as long as you have chosen an astute, well trained designer.

Well designed advertisements are attention getting and reach a larger group of your target audience.

How effective is your current designer? Is your choice of advertising style reaching your target audience?

Jason S. Oney

About the owner

I am a student at KCTCS in Lexington Kentucky. I will graduate in the spring of 2010 with a web design associate degree. In the fall of 2010 I will obtain a second associate's degree in graphic design in addition to my web degree.

I am pleased to say that I am eager to instruct, be taught, and accept criticism amiably. Although I am not an expert yet, I am well trained in my field. Developing into a highly skilled professional is in my future. I have received high marks in all web and graphic design courses I have taken, and my GPA reflects determination. My name also appears on the Dean's list each of the semesters I have attended KCTCS since 2007.

The creation of media that can be used for any purpose, such as designs that are flexible and therefore easily used for both digital web media and print work is very important. Of course, each project has limitations. I can defiantly think outside the box, and pride myself on the ability to merge the two when necessary. The end result is cheaper more cost-effective resilient advertising.
